- 3) *Explain str_replace function php with one example*
- 4) *Explain the array in php with one example*
- 5) *Explain the pi function in php*
- 6) *Explain the abs() with one example in php*
- 7) *Explain the sqrt () ? with one example in php*
- 8) *Explain the round function in php.*
- 9) *how you declare the constant in php?*
- 10) *Explain define () with one example*

unit 4 :- working with Forms

- 1) write a short note on get method*
- 2) write a short note on post method*
- 3) show one program with radio button with php*
- 4) show one program with check box with php*
- 5) show one program with text box and label box with php*
- 6) short note on validation of form in php*
- 7) short note on session in php*
- 8) short note on validation of email of form in php*
- 9) short note on validation url of form in php*
- 10) short note on cookie?*

✚ Answer the following : (Long Questions)

- 1) *Explain the get method*
- 2) *Explain the post method*
- 3) *Explain the validation of form in php*
- 4) *Explain the session in php*
- 5) *Explain the validation of email of form in php*
- 6) *Explain the validation url of form in php*
- 7) *Explain the cookie? with example.*
- 8) *Difference between array in php and java script?*
- 9) *How you declare thy array in php*
- 10) *How you declare the constant array in php*

Unit 5 : More with Forms

Answer the following : (Short Questions)

- 1) *What is the use of array in php ?*
- 2) *write the array syntax of php ?*
- 3) *What is the fixed array in php*
- 4) *short note on switch statement in php*
- 5) *Short note on double dimension array?*
- 6) *What is meant by dynamic array?*
- 7) *What are logical operators in php.*
- 8) *Difference between array in php and javascript?*
- 9) *How do you declare an array in php*
- 10) *How do you declare a constant array in php*

✚ Answer the following : (Long Questions)

- 1) *Explain the difference between get & Post in php with one example*
- 2) *Explain the how you handle the radio button , checkbox php with one example*
- 3) *Explain validate the form php with one example*
- 4) *Explain the cookie in php with one example*
- 5) *Explain fixed array in php*
- 6) *Explain the dynamic array in php one example in php*
- 7) *Explain the session with one example in php*
- 8) *Difference between array in php and java script?*
- 9) *Expalin the constant array in php with one example?*
- 10) *Explain double dimension array?*

Unit 6 :- Storing and Protecting Data

Answer the following : (Short Questions)

- 1) *What is the used of function in php ?*
- 2) *short note on session in php*
- 3) *short note on validation of form in php*
- 4) *short note on cookie?*
- 5) *short note on validation url of form in php*
- 6) *short note on validation of email of form in php*
- 7) *how you create the cookie?*
- 8) *How You create the session ?*
- 9) *How You connect to the data base*
- 10) *explain mysql in data base?*

✚ Answer the following : (Long Questions)

- 1) *Explain the validation of form in php*
- 2) *Explain the session in php*
- 3) *Explain the validation of email of form in php*
- 4) *Explain the validation url of form in php*
- 5) *Explain the cookie? with example.*
- 6) *Explain fixed array in php*
- 7) *Explain the cookie in php with one example*
- 8) *Explain validate the form php with one example*
- 9) *Explain mysql in data base?*
- 10) *Explain wamp server in data base*
